Functional Requirement 1

Users must be able to create projects/task entries

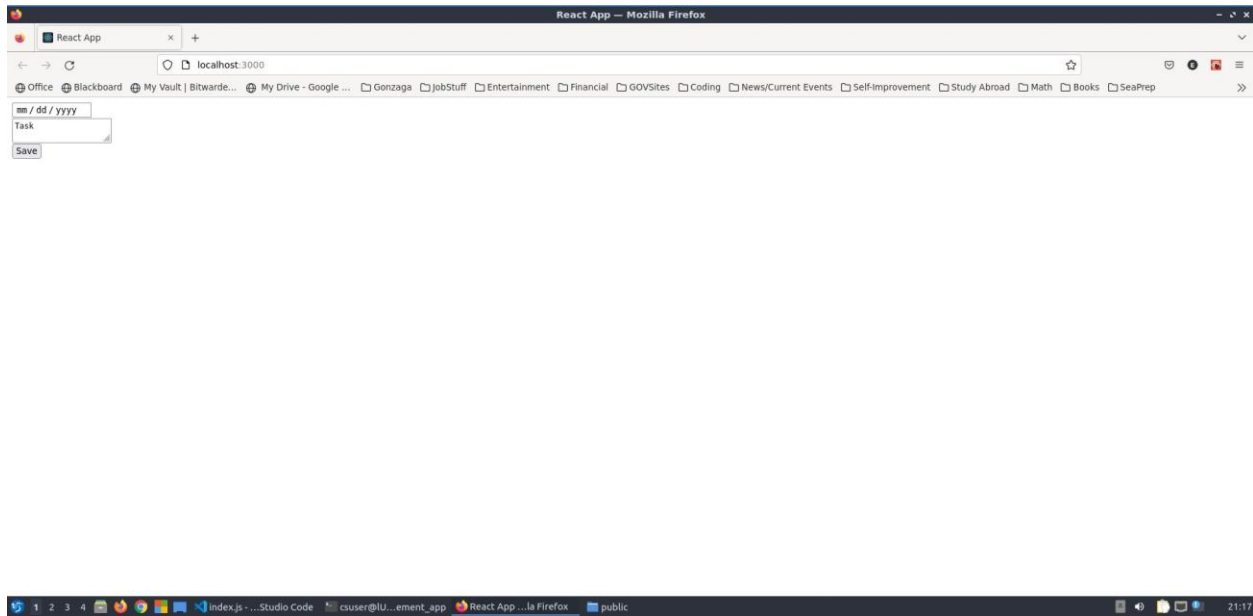

A “project” has the following minimum attributes:

- Title
- Deadline
- Check box to mark as completed
- Tasks:
 - Parts of projects that constitute the whole
 - Each has a checkbox to mark as completed
 - Each can have individual deadline if the user so chooses, but must be due by or before project deadline

The screenshot shows a web browser window titled "React App - Mozilla Firefox" with the address bar displaying "localhost:3000". The browser's bookmark bar is visible with various links. The web page contains a form with the following fields and controls:

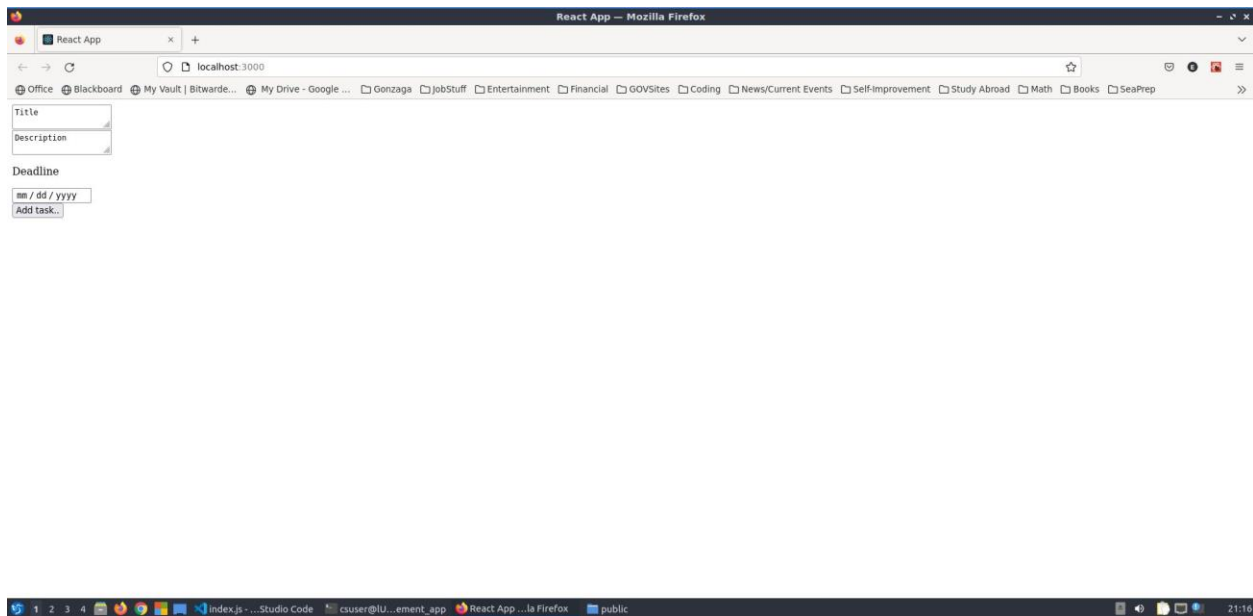

- A "Title" text input field.
- A "Description" text input field.
- A "Deadline" label followed by a date input field with a placeholder "mm / dd / yyyy".
- An "Add task..." button located below the date input.

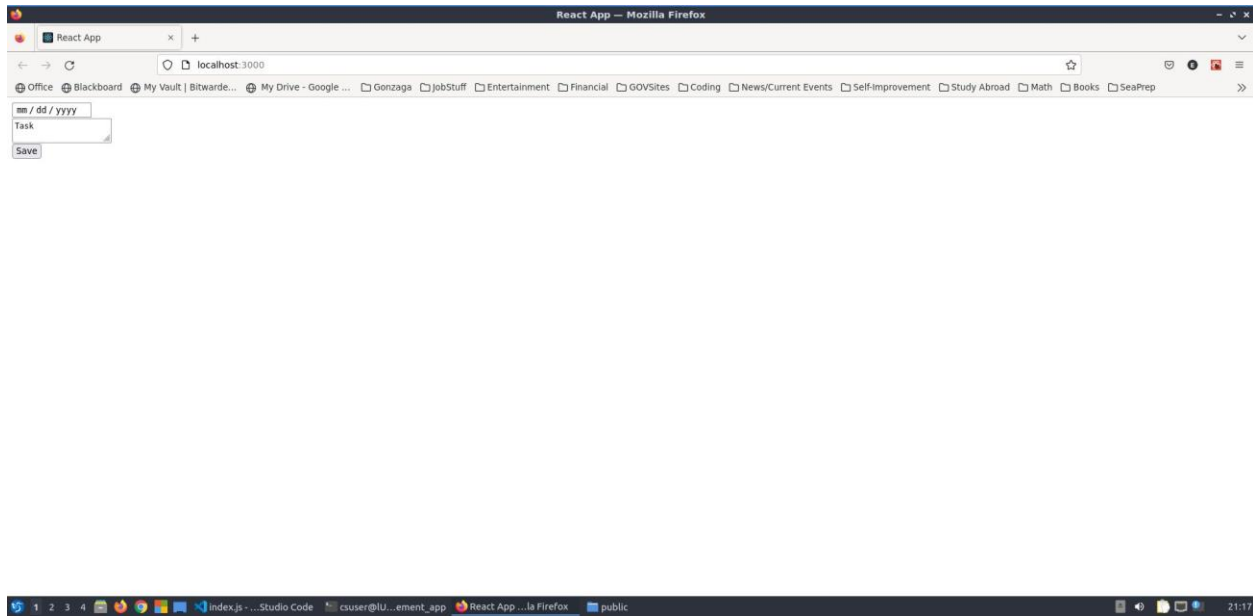

Functional Requirement 2

Users must be able to modify projects/tasks to reflect progress

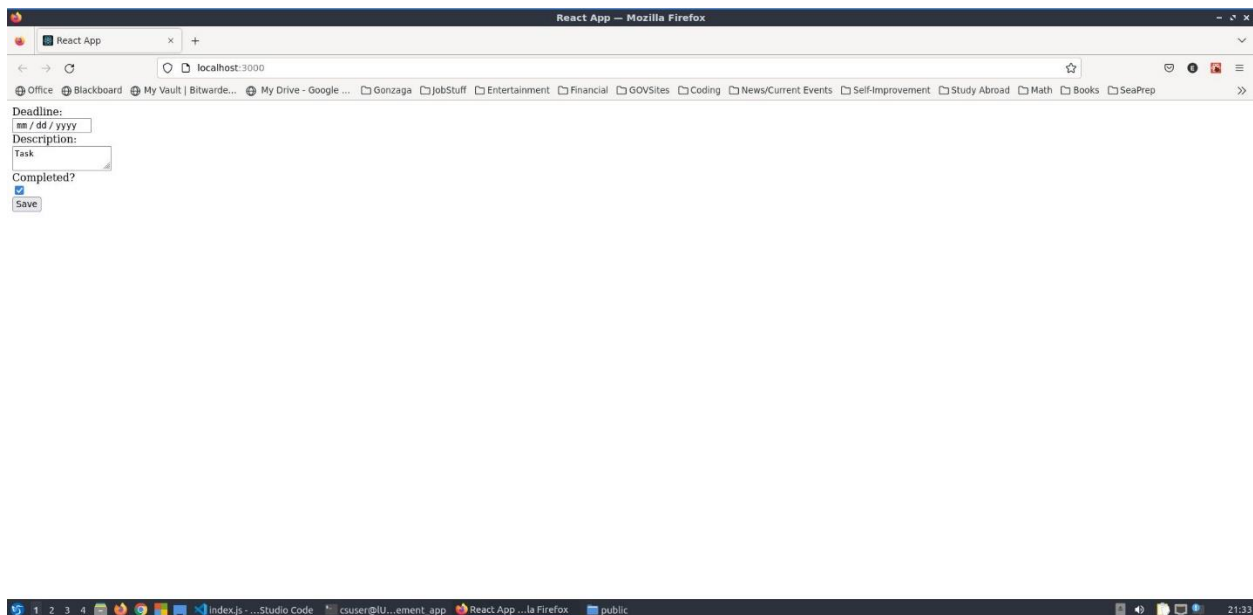

All attributes in previous requirement are modifiable by user.

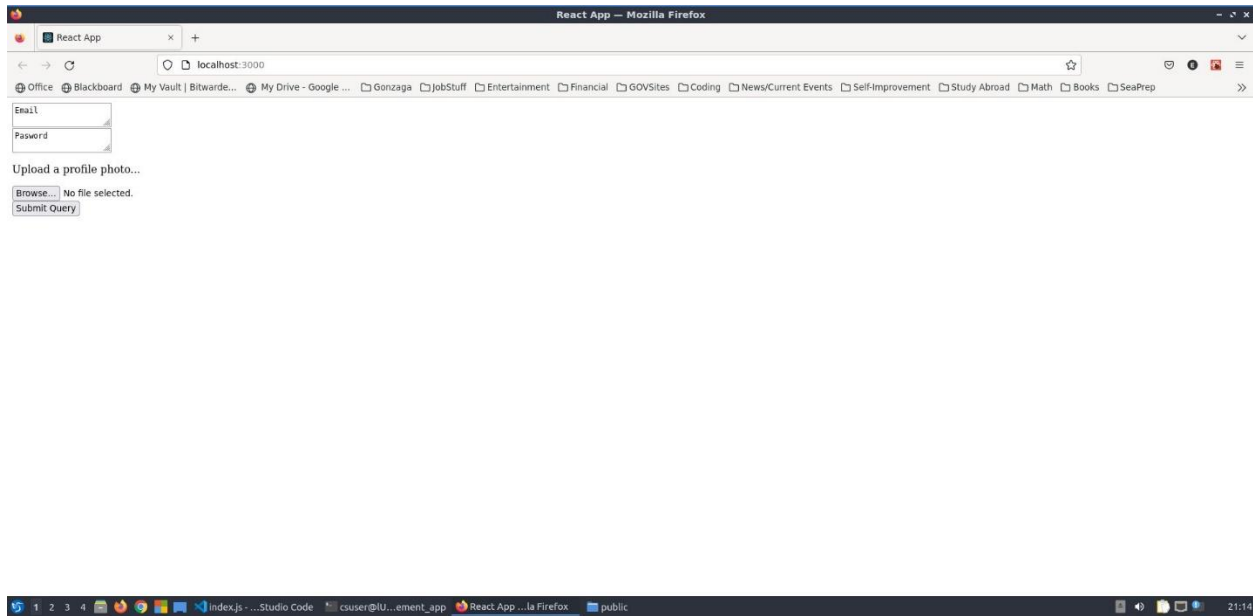

Functional Requirement 3

Users must be able to add comments to deadlines/projects/tasks

Functional Requirement 4

Users must be able to log in and out of application using a username and password

Functional Requirement 5

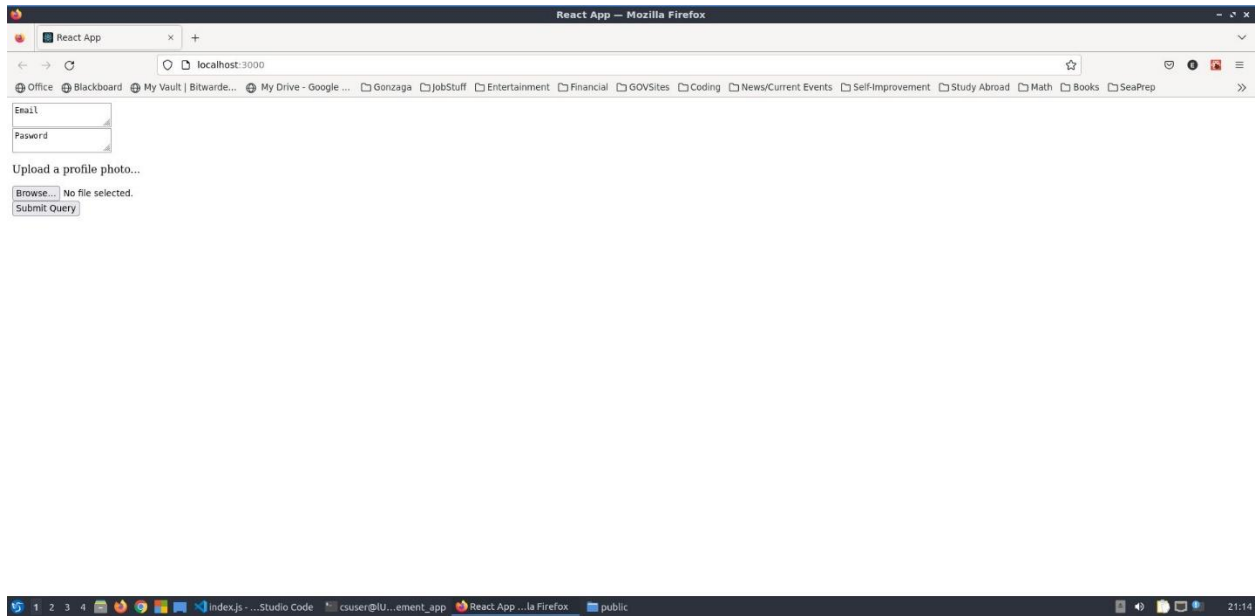

Users must be able to sort projects by deadlines

Functional Requirement 6

Users must be able to provide projects provided by another user

Functional Requirement 7

Users must be able to upload a profile picture

Notes:
